## SUMMARY

As a React Developer, I am skilled in creating dynamic and responsive user interfaces using the React JavaScript library. With a strong foundation in HTML, CSS, Bootstrap and JavaScript, I specialize in building interactive and high-performance web applications.

---

## PROJECTS

### Celewish Clone

Digital Deta

- The development of interactive user interfaces will make use of the well-known JavaScript package React. React allows us to effectively manage state, build reusable components, and handle challenging UI interactions. It will make it possible for us to create a modular and effective website.
- Best practises for code organisation, maintainability, and optimisation will be used throughout the project. By dividing concerns into reusable and modular components, we will use a component-based architecture. In order to get the best speed, we'll also make use of React virtual DOM and effective rendering strategies.

### Online Job Portal

Digital Deta • May 2023 - May 2023

- With the help of HTML, CSS, JavaScript, and Bootstrap, our project seeks to create a dynamic and responsive website. Together, these technologies provide a website that is responsive to mobile devices.
- with this project help me to learn how responsive to all device.
